Notes to Interim Consolidated Financial Statements For the Three Months Ended June 30, 2010 and 2009

(unaudited)

1. Nature of Operations

Redhawk Resources, Inc. (the "Company") and its wholly owned subsidiaries, Redhawk Copper, Inc. and Redhawk Resources (USA), Inc. are engaged principally in the acquisition, exploration and development of resource properties, and has not yet determined whether its resource properties contain mineral reserves that are economically recoverable. The Company's continuing operations and the underlying value and recoverability of the amounts shown for resource properties are entirely dependent upon the existence of economically recoverable mineral reserves, the ability of the Company to obtain the necessary financing to complete the exploration and development of its resource properties and on future profitable production or proceeds from the disposition of the resource properties.

2. Significant Accounting Policies

These interim consolidated financial statements have been prepared in accordance with Canadian generally accepted accounting principles and follow the same accounting policies and methods consistent with those used in the preparation of the most recent annual audited consolidated financial statements. The interim consolidated financial statements do not include all information and note disclosures required by Canadian GAAP for annual financial statements, and therefore should be read in conjunction with the Company's audited consolidated financial statements for the year ended March 31, 2010.

Recent Accounting Pronouncements Issued

The CICA issued three new accounting standards in January 2009: Section 1582 – Business Combinations, Section 1601 – Consolidated Financial Statements and Section 1602 – Non-Controlling Interests, these sections are harmonized with International Financial Reporting Standards. Section 1582 specifies a number of changes, including: an expanded definition of a business combination, a requirement to measure all business acquisitions at fair value, a requirement to measure non-controlling interests at fair value, and a requirement to recognize acquisition-related costs as expenses. Section 1601 establishes the standards for preparing consolidated financial statements. Section 1602 specifies that non-controlling interests be treated as a separate component of equity, not as a liability or other item outside of equity. These Standards will be applicable to the Company for annual and interim accounting periods beginning on January 1, 2011.

3. Financial Instruments

Fair value

The Company's financial instruments consist of cash and cash equivalents, short term investments, accounts receivable, reclamation bond, and accounts payable and accrued liabilities, and long term debt. The estimated fair values of cash and cash equivalents, short term investments, accounts receivable, reclamation bond, and accounts payable and accrued liabilities, and long term debt, approximate their respective carrying values.

The Company has designated its financial instruments as follows;

- Cash, cash equivalents and short-term investments are classified as "held for trading". Due to their short-term nature, their carrying value equals their fair value;
- Other receivables and reclamation bond are classified as "Loans and Receivables". These financial assets are recorded at values that approximate their amortized cost using the effective interest method; and
- Accounts payable and accrued liabilities and long term debt are classified as "Other Financial Liabilities". These financial liabilities are recorded at values that approximate their amortized cost using the effective interest method.

3. Financial Instruments - *continued*

The Company classifies its fair value measurements within a fair value hierarchy, which reflects the significance of the inputs used in making the measurements as defined in CICA Handbook section 3862 – Financial Instruments – Disclosures:

Level 1 - Unadjusted quoted prices at the measurement date for identical assets or liabilities in active markets.

Level 2 - Observable inputs other than quoted prices included in Level 1, such as quoted prices for similar assets and liabilities in active markets; quoted prices for identical or similar assets and liabilities in markets that are not active; or other inputs that are observable or can be corroborated by observable market data.

Level 3 - Significant unobservable inputs which are supported by little or no market activity.

The following table summarizes the Company's financial instruments at June 30, 2010, and shows the level within the fair value hierarchy in which they have been classified (for financial instruments measured at fair value):

	Fair Value Hierarchy Level		June 2010		March 2010
Financial Assets					
Held for trading					
Cash and cash equivalents	Level 1	\$	31,739	\$	108,956
Short-term investments	Level 1	\$	4,359,463	\$	604,463

Management of Financial Risk

The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity risk and market risk (including interest rate, foreign exchange rate and copper price risk).

Credit risk

Credit risk is the risk of an unexpected loss if a customer or third party to a financial instrument fails to meet its contractual payment obligations. The Company's credit risk is primarily attributable to cash and cash equivalents and short term investments which are held in large Canadian financial institution. The carrying value of financial assets recorded in the financial statements, net of any allowances for losses, represents the Company's maximum exposure to credit risk as at June 30, 2010.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company manages liquidity risk through the management of its capital structure. As at June 30, 2010, the Company had cash and short-term investment of \$4,391,202 (March 2010 - \$713,419) to settle current liabilities of \$411,031 (March 2010 - \$67,715).

Market risk

Market risk is the risk of loss that may arise from changes in market factors such as interest rates, and foreign exchange rates.

(a) Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company has cash balances and fixed interest-bearing debt. The Company believes it has no significant interest rate risk.

3. Financial Instruments - *continued*

(b) Foreign currency risk

The Company's exploration expenditures are predominately in US dollars and equity raised is predominately in Canadian dollars. The financial risk is the risk to the Company's operations that arises from fluctuations in foreign exchange rates and the degree of volatility of these rates. The Company is subject to fluctuations in foreign currency at the time payments are due on the US dollar promissory note. Currently, the Company does not use derivative instruments to reduce its exposure to foreign currency risk.

At June 30, 2010 and March 31, 2010, the Company is exposed to currency risk through the following financial liabilities denominated in US dollars:

	June 30, 2010 USD	March 31, 2010 USD
Long term debt	1,706,746	1,882,948
Current portion of long term debt	200,000	-

A 10% depreciation or appreciation of the Canadian dollar against the US dollar would result in an increase or decrease of approximately \$190,675 in the Company's net income (loss).

b) **Ramona Agreement**

On June 30, 2010 the Company terminated the option to acquire an interest in the Ramona property pursuant to the agreement dated May 2004 and as amended June 15, 2009. At June 30, 2010 all costs have been written off.

c) **Copper Creek Agreement**

In November 2005, the Company acquired the Copper Creek property in Arizona for a cash payment on closing of \$1.6 million and annual advance royalty payments of \$125,000 per year while the Company retains an interest in the property. On November 21, 2009 the Company entered into an amending agreement to defer the \$125,000 advance royalty payment due November 2, 2009 as follows: \$50,000 plus an advance of \$5,000 interest for a total initial payment of \$55,000 due and paid November 16, 2009, \$25,000 due and paid February 16, 2010 \$25,000 due and paid May 17, 2010 and \$25,000 due August 16 2010 and subsequently paid.

Upon commercial production, the Company is required to pay a 2.25% royalty payment until a total of \$25,000,000, in combined advance royalty and royalty payments have been made to AMT International Mining Corporation and AMT (USA) Inc. (collectively "AMT").

In accordance with the purchase and sale agreement with AMT the property is subject to a 3% Net Return Royalty granted by AMT to BHP Copper, Inc. by a Royalty Deed and Agreement dated July 30, 1998 with pre-determined reductions if the Comex price of copper is at or below \$1.20 per pound.

d) **D & G Mining Agreement**

In November 2005, the Company entered into a lease to purchase agreement with a third party for additional property within the Copper Creek boundaries. The Company paid US\$80,000 at the end of years one and two and was required to pay US\$100,000 in November 2008 and annually thereafter until the end of year fifteen. On November 4, 2009 the Company entered into an amending agreement to defer the US\$100,000 advanced royalty payment due November, 2009 as follows: US\$40,000 due and paid November 16, 2009 and US\$60,000 paid January 6 2010.

The Company has the option to purchase the property for US\$1,600,000 with the purchase price increasing by US\$200,000 per year until year fifteen. All yearly lease payments made prior to exercising the option to purchase will be applied as credits toward the purchase price in the event that the Company exercises its property purchase option.

e) **Freeport-McMoRan Agreement**

In April 2007 the Company entered into a purchase agreement with Freeport-McMoRan Copper & Gold Inc. ("Freeport") to acquire additional mining claims within the Copper Creek boundaries. The purchase price for the property was US \$3,200,000, payable by a deposit of US \$500,000 (paid), and delivery of a promissory note for US \$2.7 million. The property is subject to a 1% net smelter return royalty in favour of Freeport. (See Note 6)

f) **Impairment Loss**

Management performed impairment tests on the Company's resource properties. The Company follows four relevant pronouncements from the CICA standards, as follows Section 3061.21, Section 3063, AcG11 and EIC 174. The events that the Company considers would require an impairment charge are as follows:

- 1) The right to explore has, or will, in the near future, expire and renewal is not expected
- 2) Further exploration is not budgeted nor planned
- 3) Decision to discontinue due to lack of discovery
- 4) Potential development, but unlikely to recover asset value

Based on these pronouncements and the aforementioned events, the Company has reflected an impairment charge for the period ended June 30, 2010 on the Ramona properties totalling \$5,929 and for the year ended March 31, 2010 on the Ramona properties totalling \$42,185. This was the total amount recorded as acquisition and exploration costs for these properties to date.

8. Stock Options - *continued*

- c) The fair value of stock options used to calculate compensation for employees and consultants is estimated using the Black-Scholes Option Pricing Model. Since the options were granted under a graded vesting schedule, \$ 98,752 (2009- \$145,538) of the fair value has been recorded in the accounts of the Company during the period with \$94,858 (2009-\$120,955) recognized on the consolidated statement of operations and comprehensive loss, \$3,894 (2009-\$24,583) capitalized to resource properties. This value is estimated at the date of the grant with the following weighted average assumptions:

	June 30, 2010	June 30, 2009
Average risk-free interest rate	2.82	3.13%
Expected dividend yield	-	-
Expected stock price volatility	76.55%	82.67%
Average expected option life in years	5	5

On April 28, 2009 the TSX Venture Exchange accepted amendments as to the exercise price only for various employee and consultant incentive stock options granted between August 1, 2006 and December 10, 2007 at an exercise price of \$0.60. The incentive stock options exercise price was amended to \$0.17 for 291,000 stock options and to \$0.25 for 194,000 stock options.

The fair value of stock options used to recalculate compensation for employees and consultants on amended options is estimated using the Black Scholes Option Pricing Model. The recalculated value of \$19,033 is estimated at April 6, 2009 with the following weighted average assumptions:

	April 6, 2009
Average risk-free interest rate	2.40%
Expected dividend yield	-
Expected stock price volatility	84.57%
Average expected option life in years	3.07

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective input assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable single measure of the fair value of the Company's stock options.
